

**Betreff:** RE: PAKISTAN LOGISTICS UPDATE

Dear Valued Customers and Partners,

We would like to inform you of the current status of ocean freight operations amidst ongoing disruptions—particularly those affecting export shipments to Europe.

While the backlog situation remains significant, we are pleased to report signs of improvement. MSC has arranged additional feeder vessels to clear the majority of the backlog, with two back-to-back sailings now scheduled and open for bookings. CMA CGM has similarly deployed two additional feeders to expedite movement of delayed cargo. Meanwhile, Maersk and Hapag-Lloyd continue to operate their regular services to systematically manage pending shipments.

In contrast, ocean freight operations to the United States remain stable. Carrier schedules are running normally, and bookings are being accepted without major constraints.

Our teams are closely monitoring the situation and will continue to provide updates regarding your specific shipments on an individual basis.

Thank you for your continued support and understanding during this period.
